Core Capabilities: Intelligence gathering, sample collection, supply chain investigations and validation

Company Overview

For over 15 years we have been providing global investigative services specializing in overseas intelligence gathering. We excel in the full range of intelligence-gathering including HUMINT, OSINT & SIGINT, authentic sample acquisition and all other investigative services. Our team of trusted and resourceful operatives spans the entire world.

INSCATECH pioneered and is still the only company in the world offering forensically based food fraud investigations.

Core Competencies

Extensive expertise in providing Human Intelligence (HUMINT), Open-Source Intelligence (OSI), All-Source Intelligence (ASIA), Counter-Intelligence (CI), Signals Intelligence (SIGINT), and Socio-Cultural Analysis (SCA). Additionally, INSCATECH provides compliance and audit services, supply chain audits, source attribution, and reference sample collection. INSCATECH continues to provide food fraud detection and prevention services as well as food and other commodity supply chains intelligence and oversight. We work primarily Outside the Continental United States (OCONUS) but can equally work on a case-by-case basis in the Continental United States (CONUS)

Our investigators and analysts have capabilities that include providing actionable intelligence used to counter terrorism, violent extremists, WMD, insurgencies, international criminal organizations and emerging threats. In addition, INSCATECH provides legal oversight and analysis, due diligence, governance, risk and control services, compliance and assurance solutions, audit and monitoring services, and all sorts of forensic investigations.

Keywords
